### **Protect Yourself and Your Family This Respiratory Season**

Vaccination is one of the best ways to prevent severe illness from respiratory viruses. As fall and winter arrive, so does the season when respiratory viruses are most active. Vaccination remains one of the most effective tools to prevent severe illness, hospitalization, and complications.

Panhandle Public Health District encourages residents to discuss with their primary healthcare or vaccine provider which vaccines are right for them and their families. If you have questions or want to learn more about the vaccines available, call Tina Cook at 308-633-2866.

Vaccines are available across the Panhandle and at our Scottsbluff office. PPHD carries all recommended vaccines including influenza, pneumonia, RSV, COVID, shingles, tetanus/pertussis, and more.

### **October 4<sup>th</sup> PPHD is offering a Community Immunization Clinic at our Scottsbluff Office** 18 West 16th Street, Scottsbluff, NE

#### **Ages 65+ Drive-Thru Flu Clinic**
